

I wish You a Merry Christmas and a Happy New Year. And thank you very much for exchanging ideas and developing projects in 2008.

2008 was a year with finishing many new urban spaces in Vejle. New streets, squares with playgrounds and re-opening of the old river in the centre. And we have got a lot of new art in the city.

New shopping centres have been opened. New housing areas as "The Wawe" and "The Five Sister" are under construction and they show new ways of living in the city.

New plans for 2009 are going on just now. Specially plans for transformation The Harbour, the congress- and sport centre, and the area for education and science.

The international collaboration is going on in Nordic Wooden Cities and follow-up in the European 9 Architect competition.

Best regards

*Henrik Stjernholm
